Subject: Analytical Results from Groundwater Samples, Covol Engineered Fuels, LC, COVOL Site, C/007/0045, Task ID #3420

Dear Ms. Rau:

The Division of Oil, Gas and Mining (the Division) received your amendment to the Wellington Dry-Coal Cleaning Facility's approved Mining and Reclamation Plan (MRP) on November 11, 2009. The amendment has been conditionally approved.

Table 7-1 of the approved MRP outlines the groundwater monitoring requirements for the facility. Based upon an agreement entered into by the Permittee and the Division (dated September 15, 2008), the Permittee installed one groundwater monitoring well and obtained data for one year (4 quarterly sampling events). The agreement further established that quarterly groundwater monitoring will be conducted during the first year of reclamation after operations at the site have ceased.

The groundwater information supplied to the Division has been conditionally approved and will be incorporated into the MRP upon the receipt of 4 clean copies. Please submit the requested clean copies by January 7, 1020. At that time, a stamped incorporated copy will be returned to you for your records.

If you have any questions, please call me at (801) 538-5262 or Steve Christensen at (801) 538-5350.

Sincerely,

James D. Smith
Permit Supervisor
